INVITATION

Rotary Club Pontus Euxinus of Constanta together with Rotary Club Varna Galateea and in partnership with Society of Oceanographic Exploration and Sea Environment Protection – Oceanic Club, organize a rally at sea, between 27th-30th of June 2008, with participation of the sailboats and boats with engine from our countries (Romania and Bulgaria).

Our Club invites you to participate on this Rally at Sea with your yachts, sailboats or boats with engine, for which you have license to navigate on sea or to participate as passengers on the board of the other boats that takes part of this Rally.

The Motto of this Project is "Save the dolphins from the Black Sea!"

Those three Clubs have the main objective to attract attention, through mass-media, about the danger that those hundreds of nets fishing, abandoned or lost by the fish men or poachers, represents. Those nets fishing lost in the sea are killing over 120 dolphins / year from the total of 4.500 dolphins that exist in the Black Sea and also cause a lost of a big quantity of fish.

Because the Black Sea is sad without dolphins! Because the dolphins are part of this life on Terra! Because the dolphins are catching the fishes that are ill and because of that they protect the healthy population not to get sick, through the Program DOLPHINS IN DISTRESS! Oceanic Club together with National Museum of Natural History "Grigore Antipa" of Bucharest, are trying, in the same time, to make an inventory about the species that lives in the Black Sea and also the Black Sea pollution status.

For these objectives is necessary to buy a bout that cost 4.000 euro.
Till now, because of different actions, we succeed to find 2.600 euro but will still need 1.400 euro.
